The Somerset Republican says: "The partridge crop is scarce in this section, and what few are here hunters from a distance will be barred the right to look after, as our citizens have rightfully become tired of foreign hunters and posted their land accordingly."

As the want of a good water supply is the only drawback to the prosperity of our city, it is not high time for the citizens to take some action in the matter? If we had a water supply there would be no difficulty in having the Cincinnati Southern machine shops located here. Within the past few months several manufacturers from north of the Ohio have visited Lexington for the purpose of locating here, so as to supply their Southern demand; but there being no water supply, they abandoned the enterprise. Let our citizens call a meeting at the Court-house and discuss the question before it is too late.

That curious animal captured in the Muddy Buck, by Mark Smith, has been turned thusly when taken up by our scribes: A coyote, or a mud pup.—(Mail.) A water devil, or a siren.—(Gazette.) A water dog, or lamper eel.—(Star.) What is it?

The general slave-up participated in by the Warder Veteran Grenadiers has at last reached a compromise. At their meeting on Wednesday night a resolution was adopted turning over to Dr. Parks, who had just filed a suit against them to recover money advanced, the money in their treasury and not to be balance due, provided the Doctor withdrew his suit. Our "buzzer" buzzed the Doctor last night, and found that their proposition met with much favor from him. A meeting will be called in a few days to patch up the break in the ranks, and it is to be hoped so, artistically, that no outbreaks will occur hereafter.

The Republican "boomer" announced for Thursday afternoon at the Opera-house at which Secretary Sherman and General Kilpatrick was announced as shining lights attracted to its interior a large assemblage made up of ladies and gentlemen representing the first families of our city. The Seventh Regiment Band was present, and discoursed some soul-inspiring airs, after which Secretary Sherman was introduced, and discussed finance to the extreme. General Kilpatrick wound up the programme by a rattling address touching upon finance in general. He was vigorously applauded throughout. That reception and jubilee promised was thin enough to cut with a knife.

STARTLED US.—The Democrat, which throughout the canvass has been quietly enjoying sweet dreams, awoke suddenly last night at sunset and just roared. Several bands were engaged and a large amount of red fire used. A cannon was brought into the Market-square to bring our neighbors in the suburbs to our aid. When the doors of the Opera-house were thrown open a perfect stream of human beings poured in and crowded it to the doors. When Rice and Williams appeared upon the stage they were greeted with several rounds of applause. Rice was then introduced and occupied the stage for an hour, but failed to impress as a speaker. But when Williams took up he just made his hearers' hair dance. When he closed he was heartily congratulated by all of the "guns" surrounding him.

BLACK'S OPERA-HOUSE.—This beautiful and cozy (?) theater with its popular prices and splendid seating capacity and scenic effects, has been the subject of much censure of late by our citizens who are patrons of the place. When speaking of the auditorium a pig-pen is spoken of in comparison, for it is the extreme lack of cleanliness. From all appearance its owner's only pride is when he rakes its earnings into his coffers. The benches of the house are coated with a conglomeration of filth to which its occupants are glued during a play. From announcements ahead we are to be favored by some celebrated combinations and stars during the season, the same calling from an amusement-loving people, which are many—a large amount of money, which should at least be rewarded by comfort.

At daybreak yesterday teams began to pour in from the country, wending their way to the Fair Grounds. Improved to be a grand day, and the largest crowd of people assembled that has ever attended the Butler County Fair. The display in Mechanics' Hall is complete. In the carriage line Peter Heck was victorious, receiving two first premiums. The Excelsior hook and ladder wagon from Oxford was one of the attractions. The Ritchie & Dyer road engine took first premium yesterday. Among the important displays that attract one's attention is the machinery in motion, the Hughes carpet display, fruit, honey, jellies, fine stock of every description, besides the absorbing circle of hawkers selling their wares. The animal was detached from the buggy and permitted to graze on some fresh grass. The poor brute had not been at liberty more than five minutes before it fell, and never again regained its feet. It lingered in great agony until last evening when it died.

The creek receded three inches in the past twenty-four hours ending at noon to-day, with 3 feet 9 inches in the channel. The Lizzie Johnson is here and goes back to Big Sandy this evening.

Pilot Jim Prather opened his knowledge box this morning, and from him we gained the following facts of interest regarding low and high water. He says that in the year 1836, 23 years ago, there was only 14 inches of water on Sag Bar, 33 miles above Cincinnati, and 16 inches at Warsaw. He brought a flat boat down the river loaded with 40 tons bar iron for Madison, and at Sag Bar he took planks, set them up on edge and piled sand against them, making a dam and running the water between the planks. In this way he got fourteen inches of water to float his flatboat over the bar. He also says that in the year 1832 the river here rose to 64 feet 6 inches, and in 1847 it rose to 64 feet.

As will be seen by our dispatches, the Kanawha River at Charleston rose 8 inches since yesterday.

The Arkansas River is lower than it has been for ten years.

Captain Burd Paris says the New Natchez is much the best boat Captain Leathers ever built. She handles easier than any boat he ever had anything to do with, and she will carry four thousand bushels of corn and a half feet of water. All of which we find in the Natchez Democrat, a reliable paper, and it is fully endorsed by Snood Strong, who piloted her down from Cairo.

Shreveport Times: The river is so low here that the fish are becoming alarmed, and the turtles find it difficult to keep off of dry land.

Yesterday's St. Louis P.-D. says: The Joe Kinney got in 10 last night, Robbids and Homan pilots. Only 4 feet water with the stick at Kaskaskia, where the Grand Lake was aground. Saw catfish sometimes rolling over rocks. Over 1,000 bales of cotton refused between Walnut Bend and Osceola; brought here 1,027 bales.

Soldiers' Home Quarters Contract.

The contract for furnishing the semi-annual supply of china and glass for the Soldiers' Home, Dayton, Ohio, was awarded yesterday. There were bids opened from Boston, New York, East Liverpool, Dayton and Cincinnati. The larger portion was awarded to John A. Mohlenhoff, of our city. Tice & Huntington were also awarded a part, as were Smith, McIntire & Eckert, of Dayton. This shows well for Cincinnati. The competition from the Eastern houses was very strong, but nothing was awarded them.
